

## Jerry Lewis

Jerry Lewis started his career with Florida Public Utilities Electric Division 33 years ago. Lewis started as a laborer and worked his way up to Assistant Operations Manager for the company. Lewis worked in the Electric division until four years ago. An opportunity opened up in our Peninsula Pipeline business unit for a Project Manager. Lewis thought it would be a great idea to learn a different side of our business. Lewis is presently a Project Manager for Peninsula Pipeline Natural Gas Company, has had the pleasure of working on several projects and becoming familiar with Natural Gas from the transmission side to the final connection at a residence. Safety has been a big part of his career on the electric side and now on the natural gas side of the business.

Florida Public Utilities has completed several projects with no OSHA reportables and no injuries. Safety has been and always will be first.
